

Qbert – The Game

Ankit Kumar

UNITYID: akumar18

This game is based on the Qbert game available online. It can be played by using the arrow keys, with each key moving the player's controllable character called 'Qbert' in the desired direction. After opening the game the game can be started by pressing the space key.

The aim of the player is to visit every cube once, coloring every cube in the process, in order to complete a level. This game has a total of 4 levels. There are 3 types of creatures that would be spawning in the game to prevent the player from winning the game. If the Qbert collides with any of these creatures, the Qbert would die. There are a maximum of 3 lives for the player per game.

There are also 2 spinning disks. If the Qbert jumps onto any of these the Qbert reaches the top of the board and the corresponding disk disappears. If the player completes a level, these 2 disks are available for use again.
